Licenses, Attribution & Removal (NOTICE) — quranlab/quran-audio

This dataset hosts **no audio bytes**. It publishes metadata, external `audio_url` references, and CC-BY word timing. Binding terms are **per row** (`license`, `source`, `attribution`) and summarised here.

Why reference-only (stricter than the text corpus)

A Quran *recitation* is a separately-copyrighted **sound recording** — the reciter's fixed performance plus the producer's master — two copyright layers the (non-

copyrightable) Quran text does not have. A determined license review (6 of 6 redistribution claims refuted) found that **no surveyed source** grants an open, sublicensable license to redistribute the *recordings*, and that a notice-and-takedown posture does **not** make self-hosting safe (DMCA §512(c) safe harbor covers user-uploaded content, not operator uploads). We therefore **reference** audio by URL and never host it.

🔗 Tiers

- **Reference-only audio (Tier R):** 47 per-ayah (everyayah) + 285 per-surah (mp3quran) recordings. Each is © its reciter/producer; referenced by external URL with attribution. `commercial_ok=false`.
- **Open timing (Tier T-open):** word timing for 44 recordings, all **CC-BY-4.0** — 11 from **cpfair/quran-align** and 33 **generated by QuranLab** via a fully permissive forced-alignment toolchain (see below). Embedded here with attribution.
- **Open recording (Tier A):** embeddable audio bytes. **Currently empty** — gated on written, sublicensable open-license / true-PD clearance per recording.

🔗 Sources & attribution

- **Per-ayah audio references — everyayah.com (VerseByVerseQuran.com, BunnyCDN).** Per-ayah recitation audio referenced (not hosted) from everyayah.com (VerseByVerseQuran.com, served via BunnyCDN). Each recording is the © of its reciter / producer; included here by external reference with attribution. Removal on request via the dataset's Hugging Face Community (Discussions) tab.
- **Per-surah audio references — mp3quran.net.** Per-surah recitation audio referenced (not hosted) from mp3quran.net. Each recording is the © of its reciter / producer; included here by external reference with attribution.

Removal on request via the dataset's Hugging Face Community (Discussions) tab.

- **Word timing (cpfair) — CC-BY-4.0.** Word-level timing from cpfair/quran-align (© 2016 Collin Fair), data licensed CC-BY-4.0; aligned against Tanzil quran-uthmani. Source: <https://github.com/cpfair/quran-align>
- **Word timing (QuranLab-generated) — CC-BY-4.0.** Word-level timing generated by QuranLab via forced alignment (jonatasgrozman/wav2vec2-large-xlsr-53-arabic, Apache-2.0; torchaudio.forced_align, BSD) over verbatim Tanzil Uthmani text and the referenced everyayah audio. Licensed CC-BY-4.0.

Removal on request

Open a discussion on the **Community** tab to request removal of any reference/metadata rows; they will be removed promptly. No audio is hosted.
